

MicroCycle

New class of organisms that build on the NutriCycle platform.

COMPONENTS

- Phosphorus Solubilizers – Uses a different MOA than the biologicals in Nutri-Cycle for added benefit and targeting higher pH environments.
- K and Si solubilizers- Release large amounts of these nutrients that are stored in the soil.
- Sulfur cycle microbial booster.
- Mn and Fe solubilizers.

BENEFITS FOR PRODUCERS

- Compatible to entire Hefty Naturals line with targeted mineralization of the secondary and micronutrients in the soil.
- Easy mixing with starter programs and/or water.
- Targeted for the difficult parts of the field.

APPLICATION GUIDELINES:

Use Hefty Water-Rite (8 oz/100) and Bio-Prep (2 oz/100) if using water carrier to protect microbials in solution.

- One 75 gram bag to 40 acres in-furrow.
