### TEST COMMENTS:

*Favorable planting conditions followed by timely rains produced near perfect stands. The heavy soil combined with great fertility allowed for excellent plant health throughout the season and a majority of stalks were standing well at harvest. Moisture was adequate from planting through much of June allowing for stress-free pollination, however, the remainder of the season was very dry. A few small showers late Aug and early Sept may have added kernel depth. Excellent yields considering total rainfall from 5/1 through 9/15 was 7.7" below the 30-yr average.*
