

Cereal  NS+

# PLANTER BOX ADDITIVE

THE BUILDING BLOCKS OF  
HEFTY COMPLETE SEED TREATMENT  
FOR CEREAL GRAIN CROPS

DESIGNED FOR

# CEREAL GRAIN CROPS!

## WHAT IS CEREAL NS+?

**CEREAL NS+** combines talc with Nutri-Cycle and Heat Shield, two foundational products found within Hefty Complete Seed Treatment. This technology was previously only available in Nutri-Shield for row crops or as a seed treatment on Hefty Brand Corn and Soybeans.

**CEREAL NS+** is the newest addition to the talc additive market and is specifically built for cereal grain crops. Unlike Nutri-Shield, **CEREAL NS+** has a higher talc ratio for proper coverage of cereal grain seed.

You can simply add **CEREAL NS+** to any drill or air drill system for improved flowability, more even emergence, and stronger stand establishment early in the season.

## COMPONENTS:

- Talc
- 26 nutrient solubilizers that break minerals down into plant-available nutrient form, also found in Nutri-Cycle.
- 6 strains of trichoderma that help plants manage heat and drought stress, also found in Heat Shield.

## APPLICATION GUIDELINES:

- One 20-pound container of Cereal NS+ covers 240 acres of cereal grain crops.
